

How To Video

1 To Start Charging

Plug In

Firmly insert the charging connector handle into the charge port on your vehicle, ensuring the connector is secure, usually with a click.

2

Activate by App

OR

2

Activate by RFID

On the Hypercharge app, tap on this charger as shown on the map **or** enter the station ID (found on the side of the charger) (or scan the station ID QR code on the side of the charger), then tap "Start" in the app. Charging will begin.

Authenticate your session by placing your RFID card, fob, or device on the wireless symbol located on the front of the charging station. Charging will begin.

To End Charging

1

Unplug

If your vehicle has a charging connector lock, release it. Press down firmly on the handle's latch to withdraw the connector.

2

Retract

Pull gently on the charging cord tether so it retracts. Place the charging connector into the holder on the station.
